DETAILED ACTION

1. Applicant's arguments with respect to claim 33 have been considered but are moot in view of the new ground(s) of rejection.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Semel (U.S. Patent No. 6,068,813).

Semel discloses a metal powder composition comprising:

an iron-based prealloy powder, col. 9, lines 23-38,

a nickel containing powder, col. 9, lines 39-49,

a copper containing powder, col. 9, lines 50-58, and

a graphite powder material, see col. 10, lines 21-37,

wherein the iron-based prealloy powder is an iron-molybdenum prealloy powder containing less than 0.75 materials such as Mn, Cr, Si, Cu, Ni, or Al, see col. 7, lines 43-54. Semel further teaches the metal powder composition can also contain other alloying powder that may be blended with the metallurgical powder composition such as Mo, Cr, V, Nb. Note that these alloying powder are known as carbide-producing element, col. 9, lines 59-66.

Semel differs from the claim in that Semel does not specifically teach iron-based powder material comprises a chrome molybdenum steel powder, however it would have been obvious to one of ordinary skill in the art at the time the invention was made to select chromium from the broader range of prealloying elements disclosed by Semel to be included in the iron-molybdenum prealloy powder as Semel teaches that any of prealloying elements listed above can be included in the iron-molybdenum base

alloy to be used in powder metallurgy. --- Note: Even if a reference teaches a preferred range within a broader range, it still does not "teach away" from the claimed invention. See MPEP 2123.

While Semel does not teach the limitation "metal powder composition for use in selective laser sintering", the claimed intended use of the claimed alloy does not lend patentability to the alloy. A mere statement of a new use for an otherwise old or obvious composition cannot render a claim to the composition patentable. See In re Lemin, 51 CCPA 942, 326 F.2d 437, 140 USPQ 273 (1964), In re Thuau 135 F.2d 344, 57 USPQ 324 (CCPA 1943), Ex parte Douros 163 USPQ 667 (POBA), and In re Craig, 188 F.2d 505, 89 USPQ 393 (CCPA 1951).

4. Claims 16, 18-20, 23-32 are allowable.
